

Number Sense Workout:

• Fractions •

1) Draw a picture to show your answer:

How can two candy bars be shared evenly by three kids?
All of the candy bars must be used — no leftovers.

2) Every day the number of bacteria in the jar doubles.
After 20 days the jar is full.

When was it half ($\frac{1}{2}$) full? _____

When was it an eighth ($\frac{1}{8}$) full? _____
